

Cezar Nareswara Respati

Full-Stack Developer | Software & Systems Architect

cezar.nares@gmail.com | Semarang, Indonesia | github.com/cnaresr | linkedin.com/in/cezar-nareswara-respati-8b8a55327

PROFESSIONAL SUMMARY

Full-Stack Developer and Software Architect specializing in high-performance backend systems, distributed architectures, and database engineering. Experienced in architecting low-latency microservices, real-time event streaming pipelines, and type-safe web applications using TypeScript, Rust, Node.js, and SQL/NoSQL databases. Passionate about system reliability, edge computing, and clean software architecture.

TECHNICAL COMPETENCIES

Languages & Core: TypeScript, Rust, Go, Python, C++, SQL & PostgreSQL

Frameworks & Runtimes: Astro Islands, React 19 & Vite, Next.js App Router, Tailwind CSS v4, Node.js LTS v22, Cloudflare Edge

Systems & Infrastructure: PostgreSQL (Citius / Pgpool), Redis Sentinel, Apache Kafka, Docker, Kubernetes, Cloudflare Edge, WebRTC, Was

FEATURED ENGINEERING PROJECTS

Veloce Query Fabric

Jan 2023 - Present

Tech: PostgreSQL · Rust · Kafka · Docker

- Distributed telemetry aggregator and sharded PostgreSQL cluster fabric with live partition rebalancing. Delivers instantaneous metric ingest for industrial IoT sensors with strict guarantees.
- Architecture: Veloce Architecture Document V2.1 - Citius/Pgpool partition strategies, Rust memory pools, and zero-copy socket IO.

AetherLog Realtime Analytics

Jul 2023 - Mar 2024

Tech: Astro · SSE Streams · Tailwind

- Astro SSR combined with a Server-Sent Events streaming pipeline. Zero initial client-side JavaScript baseline while streaming 100,000 live event logs to an edge dashboard.
- Architecture: AetherLog Architecture - HTTP/2 SSE streaming engine, zero-hydration Islands fallback, and sub-10ms TTFB edge caching.

Hyperion Design System Engine

Jan 2023 - Dec 2023

Tech: Rust · Vite · React · TypeScript

- AST-driven design token compiler written in Rust and executed in WebAssembly across multi-brand React and Vite frontends. Generates strict TypeScript types and optimized CSS in <12ms.
- Architecture: Hyperion Architecture - AST token graph resolution, CSS variable emission trees, and WebAssembly memory sharing.

Solis Distributed Mesh v2

Oct 2024 - Mar 2025

Tech: Rust · WebRTC · Protobuf · Wasm

- Sub-millisecond peer-to-peer telemetry gossip protocol over WebRTC data channels with state-based conflict resolution.
- Architecture: Solis Distributed Mesh Architecture V2 - Multi-peer state reconciliation using CRDTs over WebRTC data channels.

CERTIFICATIONS & CREDENTIALS

AWS Certified Solutions Architect

AMAZON WEB SERVICES | EXPIRY: 2027

PostgreSQL Certified Enterprise DBA

POSTGRES SQL GLOBAL | VALIDATION: PERPETUAL

Certified Kubernetes Administrator

CNCF / LINUX FOUNDATION | EXPIRY: 2027

Meta Certified Frontend Lead

META OPEN SOURCE | VALIDATION: VERIFIED

EDUCATION

Politeknik Negeri Semarang (POLINES)

Semarang, Indonesia

Diploma Degree in Informatics / Computer Engineering
